

Custom Mud Flap Measuring Form

Name	
Year	
Make	
Model	

Please refer to **installation instructions** to understand what factory hole to measure from.

What factory hole are you measuring from?

STEP 1

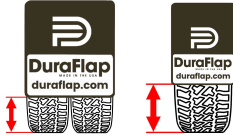

1: Measure from factory hole to the ground.

Enter exact number of inches from factory hole to the ground.

Front: Rear:

STEP 2

2: What mud flap clearance from the ground do you want?

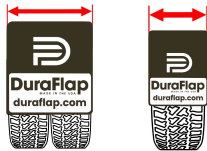

We recommend 7-9" off the ground (most curb heights are 6").

7" if towing a boat or trailer

9" if not towing.

Front: Rear:

STEP 3

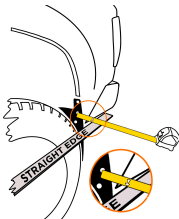

3: How wide do you want your mud flap?

Our standard sizes are 12", 14", and 20" but you can specify any width.

Front: Rear:

STEP 4

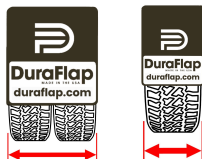

4: Measure from the factory hole to outside of tire.

Enter exact number of inches from factory hole to the outside of tire using a straight edge.

Front: Rear:

STEP 5

5: What is the overall width of your tire(s)?

Front: Rear:
